## 24 Module Baghouse Project Completed

*"The team did an excellent job from fabrication to delivery, completing the project safely and on schedule", stated Senior Project Manager Victor Rupert.*

Moran Iron Works completed a large pulse jet fabric filter system; the project began January 2012 and the last barge pulled out of port and headed for our customers plant in July 2013.

Above: Final barge load that was delivered to the customer's site.

This 19 month project also consisted of support steel, enclosure steel, and access steel to build two complete twelve-module PJFF's that were barge shipped to a facility in Southern Michigan.

Once fully installed, they will be a small piece of a very large air filtration system. Some of the sections weighed over 160,000 pounds attributing to the use of over 2,650 tons of steel to complete the project.

## Barging Completed for Large Ductwork Project

The last barge load for our Unit #1 & #2 SDA inlet & outlet ductwork project has been loaded and is ready to be delivered to a Power Plant in Southern Michigan.

Fabrication on this project started on November 21, 2012 under the supervision of Project Manager John Kreft.

## Moran Iron Works Annual 4th of July submission finally revealed!!!

The 70 foot long, 25 foot wide sculpture is a loose replica of the World War II Aircraft Carrier the USS Bunker Hill.

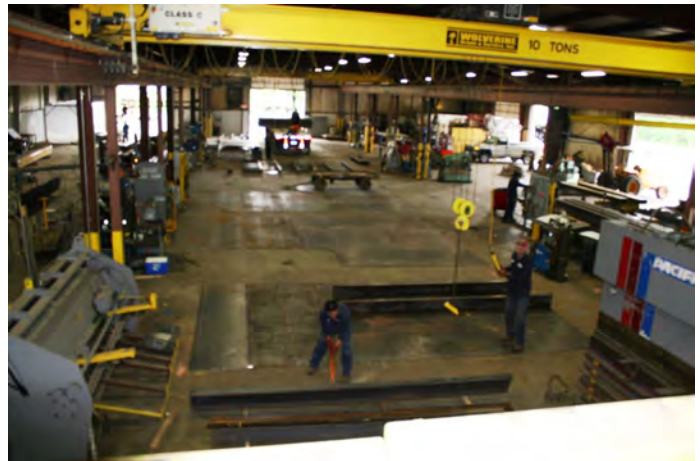

The Bunker Hill was awarded 11 battle stars during its career.

It is next scheduled to be shown at the Nautical Festival Parade in Rogers City on August 4th, 2013.

## MIW North—On the Move

The vision of Tom Moran has been to grow the business by creating jobs and training our associates to be the best welders and fabricators in the business.

We are utilizing the proven skill level of the Onaway Headquarters Team to train our MIW North associates and rotate them back to the Cheboygan Shop to increase the company's high quality and productivity to support our expanding business.
