*Teamwork is the secret that  
makes common people  
achieve uncommon result."*

— Jfeanyi Enoch Onuoha

## Year in Review– 2013

This year has brought amazing opportunity and growth to Moran Iron Works, due to a strong customer base and an ambitious workforce we have seen the evolution and establishment of:

- **8,300 Tons** of completed fabricated modules barged/trucked/ or picked up from our facilities.
- MIW has expanded its workforce to include an additional **37 skilled workers**
- An addition of 47,000 square feet of manufacturing area, as well as 30,000 square feet in office area
- The development of the Port Calcite Collaborative and the purchase of our newest and largest crane, the **Manitowoc 16,000 Crawler Crane**
- **Business of the Year Award** from the Cheboygan Chamber of Commerce, the **Economic Development Project of the Year Award** from the Northern Lakers Economic Alliance (NLEA), and the **Patriotic Award** from the Department of Defense

## Ending the Year With a Bang

Moran Iron Works has obtained six new projects in the first weeks of December! Some of them will be in the beginning stages of fabrication in early January 2014.

## *Employee Of The Year...*

### *Keith Raymond*

Keith Raymond is the recipient of the Moran Iron Works' 2013 Employee of the Year Award. from Moran Iron Works. The recipient is chosen by the nine member Board of Directors. Every year they have the difficult task of picking one team member from the powerhouse of employees at MIW.

“This year Keith stood out amongst the group, with his demonstration of knowledge and skill. He has proven himself to be a driving force in establishing our mentoring program and helping to cultivate the MIW culture and values.” stated Geri Ganske, COO.

When Keith was hired 17 years ago, Tom Moran knew he was making a wise decision. From his first day he brought a wealth of skill, talent, and knowledge. This year he was promoted and established himself as a

mentor for other welders.

The Mentoring Program was more of an idea than a job description, but Keith ran with it, creating a functioning and now fundamental position within MIW. Due to his foresight, this program has not only succeeded in creating a better and more educated welding force, but has opened doors for his co-workers, and has enabled MIW to hire a second Mentor in 2013.

When asked, a while back, about how to best assist MIW to succeed in the future, Keith honored us with what has become a MIW tagline:

***“In Order To Succeed, We Must All Be Teachers.”***

### Project Update— Consumers Energy

39 modules on the customers jobsite, 23 modules at our deep water port, 11 modules in various stages of fabrication currently in our Onaway facility, 27 additional modules to complete before our May 2014 deadline.
